

**PRESS RELEASE**

## **Structural steel specialist T T J builds order book to S\$184m with new projects totaling S\$15m**

SINGAPORE - 16 June 2011 – T T J Holdings Limited (“T T J” or together with its subsidiaries, the “Group”) wishes to announce that it has secured four industrial construction projects totaling approximately S\$15 million in Singapore, boosting its current order book to S\$184 million, from S\$169 million as at 9 April 2011. The Group has commenced work on some of these projects with completion expected by the end of 2012.

Two of the contracts pertain to work for the Singapore LNG Terminal on Jurong Island. The first contract was awarded by main contractor, Samsung C&T Corp to supply, fabricate and install structural steelwork for the third tank and piperacks at the terminal. Notably, this contract constitutes additional work secured by T T J from Samsung C&T Corp for the terminal, underscoring the confidence and trust that clients have in T T J’s ability to deliver quality projects successfully.

The second contract was awarded by Antara Koh Pte Ltd for the jetty at the LNG Terminal. T T J has already commenced work on the structural steel piperacks of the jetty and expects to complete the project by the last quarter of this year.

The third contract secured by the Group is for the provision of structural steelwork for Asahi Kasei Chemicals’ new solution-polymerized styrene-butadiene rubber (S-SBR) production plant in Singapore. Awarded by main contractor, Hitachi Plant Technologies Ltd, T T J will begin work on this facility in June 2011 with expected completion in the second quarter of 2012.

As testament to T T J's top-notch customer service and work quality, the Group also secured additional work from Shell Eastern Petroleum Pte Ltd for the Scot and Bugis EPCM Project on Pulau Bukom, which is expected to be completed by early 2012. The Group had announced the first contract from Shell in January 2011.

Says T T J's Chairman and Managing Director, Mr Teo Hock Chwee (张福水): "Since January this year, T T J has secured significant contracts worth approximately S\$71 million, the majority of which relates to development projects for customers in the petrochemical, oil & gas and manufacturing industries. We believe that this trend underscores the continued strength of Singapore's industrial construction industry and going forward, we will continue to work hard to maintain T T J's leadership position in the structural steel business in Singapore."

In view of development projects announced by various industrial giants, the Group believes that there are ample potential projects in Singapore's construction sector. Amongst others, projects in industry pipeline include the Jurong Aromatics Corporation petrochemical plant; the 800-MW Island Power Cogen plant; extension of the Singapore LNG Terminal; the Tuas Power multi-utilities plant at Tembusu, as well as two gas-fired combined cycle power plants for Keppel Corp and Tuas Power Generation.

Concluded Mr Teo: "Winning new customers and getting repeat orders from existing ones are equally important to T T J in order to sustain our business. Over the last 30 years, we have shown a commitment to our clients and their projects, and thus earned their trust in our capability to perform contracts. We believe that our steadfast commitment as well as substantial engineering experience and stellar track record in the structural steel business, places the Group in a strong position to capitalize on opportunities in the construction sector."
